LESSON OBJECTIVES
Lesson 1 Exponents

- ZE.1.a Model exponents with the same base raised to a power of two using manipulative blocks
- ZE.1.b Evaluate exponents with the same base using blocks
- ZE.1.c Name numbers in exponential form in at least three different ways
- ZE.1.d Apply appropriate strategies to solve word problems

Lesson 2 Place Value

- ZE.2.a Use models to show place value in expanded notation
- ZE.2.b Write numbers in expanded notation
- ZE.2.c Express numbers in exponential notation
- ZE.2.d Evaluate exponents with a base of ten

Lesson 3 Decimal, Expanded, Exponential Notation

- ZE.3.a Write decimals in expanded notation
- ZE.3.b Rewrite decimal numbers in decimal notation
- ZE.3.c Determine whether to multiply or divide by ten when “moving” a decimal point to increase or decrease its value
- ZE.3.d Explain why money is a practical application for the use of decimal values

Lesson 4 Add Decimals

- ZE.4.a Use models to add decimal values
- ZE.4.b Apply regrouping principles to compute decimal addition problems accurately
- ZE.4.c Apply knowledge of adding decimals to solve word problems

Lesson 5 Subtract Decimals

- ZE.5.a Use models to subtract decimal values
- ZE.5.b Apply regrouping principles to compute decimal subtraction problems accurately
- ZE.5.c Apply knowledge of subtracting decimals to solve word problems

Lesson 6 Metric: Greek Prefix

- ZE.6.a Name metric prefixes that describe large quantities
- ZE.6.b Identify corresponding value for metric prefixes
- ZE.6.c Express metric measurement relationships for large quantities as ratios
- ZE.6.d Determine the best metric measure for a given object or situation
- ZE.6.e Convert given values between metric units that describe large quantities

Lesson 7 Metric: Latin Prefix

- ZE.7.a Name metric prefixes that describe small quantities
- ZE.7.b Identify corresponding values for metric prefixes
- ZE.7.c Express metric measurement relationships for small quantities as ratios
- ZE.7.d Determine the best metric measure for a given object or situation
- ZE.7.e Estimate using metric units of measure
- ZE.7.f Solve multi-step word problems using metric measurement

Lesson 8 Metric: Conversion 1

- ZE.8.a Convert large metric units to smaller metric units
- ZE.8.b Convert large metric units to smaller metric units using the “shortcut” (adding zeros)
- ZE.8.c Determine which metric unit corresponds most closely with U.S. customary units
- ZE.8.d Apply knowledge of the metric system to solve multi-step problems

LESSON OBJECTIVES

- Lesson 9 Multiply $\frac{1}{10}$ or 0.1**
- ZE.9.a Model multiplication of tenths using blocks
 - ZE.9.b Multiply tenths using place-value notation
 - ZE.9.c Multiply tenths using decimal notation
 - ZE.9.d Apply knowledge of multiplying tenths to solve word problems
- Lesson 10 Multiply $\frac{1}{100}$ or 0.01**
- ZE.10.a Multiply hundredths using decimal notation
 - ZE.10.b Multiply hundredths using the standard algorithm
 - ZE.10.c Apply knowledge of multiplying hundredths to solve word problems
- Lesson 11 Percentage of a Number**
- ZE.11.a Model the relationship between fractions, decimals, and percentages
 - ZE.11.b Explain that percent means out of one hundred
 - ZE.11.c Write a percentage as a decimal
 - ZE.11.d Write a percentage as a fraction
 - ZE.11.e Identify common decimals and fractions as percentages (e.g., $\frac{1}{4} = 0.25 = 25\%$)
 - ZE.11.f Change a percentage to a decimal
 - ZE.11.g Change a percentage to a fraction
 - ZE.11.h Use knowledge of percentages to solve word problems

- Lesson 12 Percentages $\geq 100\%$**
- ZE.12.a Change a whole number to a percentage
 - ZE.12.b Change a fraction to a percentage
 - ZE.12.c Convert a mixed number to a percentage
 - ZE.12.d Convert a decimal to a percentage
 - ZE.12.e Solve problems by converting among quantities written as a fraction, decimal, and percentage
- Lesson 13 Pie Graphs**
- ZE.13.a Explain that a pie graph represents a visual presentation of the whole and its parts
 - ZE.13.b Interpret data on a pie graph
 - ZE.13.c Find the percent of a number given data on a pie graph
 - ZE.13.d Apply knowledge of percent to display data on a pie graph
- Lesson 14 Multiply Decimals**
- ZE.14.a Estimate factors to verify the reasonableness of an answer
 - ZE.14.b Multiply decimal values using decimal notation
 - ZE.14.c Calculate the placement of a decimal point in a decimal multiplication problem by counting the spaces to the right of the decimal point
 - ZE.14.d Solve problems that involve multiplication of decimal values
- Lesson 15 Metric: Conversion 2**
- ZE.15.a Convert small metric units to larger metric units by using ratios
 - ZE.15.b Use the shortcut method of “moving” one decimal place for each step when converting metric units

Lesson 16 Area, Circumference of a Circle

- ZE.16.a Substitute the approximation of π (3.14) into formulas to calculate values for a circle
- ZE.16.b Apply the formulas πd and $2\pi r$ to calculate the circumference of a circle
- ZE.16.c Compute the area of a circle using the formula πr^2

<i>Posttest (Unit Test III)</i>										

LESSON OBJECTIVES
Lesson 17 Divide a Decimal by a Whole Number

- ZE.17.a Divide a decimal by a whole number
- ZE.17.b Identify where to place the decimal point in the quotient
- ZE.17.c Explain the procedure for dividing a decimal by a whole number
- ZE.17.d Use multiplication to check the accuracy of the answer for a division problem

Lesson 18 Divide a Whole Number by a Decimal

- ZE.18.a Divide whole numbers by a decimal value
- ZE.18.b Adjust decimal points by multiplying the divisor and dividend by the same power of 10
- ZE.18.c Use estimation to determine the reasonableness of a quotient
- ZE.18.d Apply knowledge of dividing decimal numbers to solve word problems

Lesson 19 Solve for Unknown 1

- ZE.19.a Divide to solve equations with decimal values
- ZE.19.b Use equations with decimal values to solve word problems

Lesson 20 Divide a Decimal by a Decimal

- ZE.20.a Divide a decimal by a decimal value

Lesson 21 Decimal Remainders

- ZE.21.a Divide a decimal by a whole number by adding zeros to yield a quotient without a remainder
- ZE.21.b Express a quotient by rounding to a given place value when numbers do not divide evenly
- ZE.21.c Write a remainder as a decimal
- ZE.21.d Divide until a pattern is determined and write the answer with a vinculum over the repeating digits
- ZE.21.e Express a remainder as a fraction

Lesson 22 Solve for Unknown 2

- ZE.22.a Solve for an unknown in an equation
- ZE.22.b Substitute the solution for the variable in the original equation to verify the answer

Lesson 23 Transform Any Fraction

- ZE.23.a Convert fractions to decimals
- ZE.23.b Convert fractions to decimals and percentages to solve problems

<i>Posttest (Unit Test IV)</i>										

LESSON OBJECTIVES
Lesson 24 Decimals as Rational Numbers

- ZE.24.a Write a terminating decimal as a fraction in simplest form
- ZE.24.b Use knowledge of decimals and fractions to solve problems

Lesson 25 Mean, Median, Mode

- ZE.25.a Calculate the mean for a set of data
- ZE.25.b Find the median for a set of data
- ZE.25.c Determine the mode for a set of data
- ZE.25.d Analyze a given set of data using mean, median, and mode

Lesson 26 Probability

- ZE.26.a Determine the probability of how likely something is to happen or to be true in a given scenario
- ZE.26.b Record the probability in ratio form in lowest terms for a given scenario

Lesson 27 Points, Lines, Rays, Line Segments

- ZE.27.a Define the geometric terms point, line, ray, and line segment
- ZE.27.b Draw representations for the geometric terms point, line, ray, and line segment
- ZE.27.c Represent a point, line, ray, and line segment using geometric symbols
- ZE.27.d Identify the symbol for infinity
- ZE.27.e Define infinity
- ZE.27.f Explain the relationship of infinity to a point, line, ray, and line segment

Lesson 28 Planes and Symbols

- ZE.28.a Define zero-, one-, two-, and three-dimensional geometric shapes
- ZE.28.b Identify zero-, one-, two-, and three-dimensional geometric shapes
- ZE.28.c Define similar, equal, and congruent
- ZE.28.d Identify the symbols for similar, equal, and congruent

Lesson 29 Angles

- ZE.29.a Name the parts of an angle
- ZE.29.b Define angle and right angle
- ZE.29.c Use letters and symbols to name angles
- ZE.29.d Explain that angles are measured in degrees
- ZE.29.e Identify a box symbol as a representation of a 90-degree angle
- ZE.29.f State that a circle contains 360 degrees

Lesson 30 Types of Angles

- ZE.30.a Define acute, obtuse, and straight angles
- ZE.30.b Classify an angle as acute, obtuse, right, or straight
- ZE.30.c Determine if an angle is acute, obtuse, right, or straight, given a degree measurement
